

# **KEEP OUR WATERS PURE WHEN TRAVELING**

**Dumping recreational vehicle wastes in storm drains or in a ditch will pollute rivers, stream sand lakes. This pollution can harm our drinking water supplies, make swimming dangerous and kill fish. As you travel, please locate waste disposal stations for proper disposal.**

\*Must purchase daily or yearly State Park sticker (daily stickers are \$8 for out of state and \$6 for Michigan residents)\*

\*\*\*Information is current as of November 2006, please call for current prices and hours.

**Why dump waste at a sanitary dump site location?** By using these disposal stations, the sanitary waste will be treated and disposed of properly, instead of ending up in storm sewers, which often discharge straight to streams, rivers, and lakes.

## Dumping Waste into Storm Drains or in Ditches Causes:

- Decreased *fish* and other aquatic life habitat.
- Increased cases of Swimmer's Itch and other *harmful health effects*.
- Increased chance of *contaminated drinking water supplies*.
- Increased *alerts* on the dangers of eating fish.
- Increased drinking water *treatment costs*.
- Increased amounts of *beach closures* due to bacteria.
- Increased *foul odors*.
- Increased *algae blooms* causing fish kills.

keep it **BLUE**  
 only rain in the drain
